ATM AWARENESS PROGRAMME

**Prof. SubhashPatil, NSS Program officer with
Volunteers in front of ATM in Yaramarus
village**

**Prof. SubhashPatil, NSS Program officer with
volunteer demonstrating the use of ATM to the
villager**

NSS cell conducted an ATM awareness program to our college staff and students on 10-10-2019 in SLNCER. ATM attacks are among the most prominent forms of fraud striking banking institutions and their customers. Total of 45 students took participation.

According to this program, we had given awareness regarding ATM, here are some consumer tips to help reduce ATM Skimming incidents.

- i) Be wary of anything about the ATM machine that looks out of the ordinary.
 - ii) Steer clear of a jammed ATM machine that forces customers to use another ATM that has a skimmer attached. Often, the criminal will disable other ATM's in the area to draw users to the one that has the skimming devices on it.
 - iii) Always protect your PIN; Don't give the number to anyone and cover the keypad while you are entering the PIN
 - iv) If you find unauthorised ATM transactions on your bank account, immediately notify local law enforcement, as well as your financial institution or the establishment where the ATM is located.
- Finally ended this event with huge message and awareness of ATM.
